# ABOUT COMPANY

We recognize that, however our achievements are to date, the quest for improvement is never ending. Our organizational culture is based on the way in which we act and work together to improve our services.

Money Power 33 Days began with the humble goal of helping everyday Australians reach their retirement goals through a Self Managed Super Fund, also known as SMSF. After 5 years, our goal still remains the same, but our passion for helping Australians reach their retirement goals grows.

# TOGETHER WE CAN!

Money Power 33 Days is a non-profit organization, which works with children who are diagnosed with cancer. We work on two projects – The Accommodation Project and The Survivor Project.

We want to open up a world of opportunities for every vulnerable by ensuring food security.

# Join us in our effort to feed and nourish the marginalized section of the society.

## Integrity in everything we do

We strive never to take the easy path, but always the honest one. We practice integrity in all our actions and try to do the right thing by every stakeholder.

## Serve with passion

We are fiercely committed to our purpose of poverty alleviation, and work with a burning desire to make a difference.

## Empathy for all

We are committed to working together with unconditional respect, freedom, trust and support for each other.

# WHAT WE DO?

## 01 Deliver a unified giving experience

Exceed donor expectations and increase retention with customized campaigns, best-in-class integrations, embedded donation forms, and preferred payment methods.

## 02 Diversify your digital fundraising strategy

To maintain donor retention, it's critical your nonprofit organization offers the right giving experience at the right time.

With a robust array of fundraising campaign types, from direct giving to peer-to-peer, crowdfunding, and events, our trusted platform can help you meet each donor where they're at.

# WHAT IS P2P

A peer-to-peer network is a simple network of computers. It first came into existence in the late 1970s. Here each computer acts as a node for file sharing within the formed network. Here each node acts as a server and thus there is no central server in the network. This allows the sharing of a huge amount of data. The tasks are equally divided amongst the nodes. Each node connected in the network shares an equal workload. For the network to stop working, all the nodes need to individually stop working. This is because each node works independently.

# WHAT IS CROWDFUNDING

**Crowd funding is the use of small amounts of capital from a large number of individuals to finance a new business venture. Crowd funding makes use of the easy accessibility of vast networks of people through social media and crowd funding websites to bring investors and entrepreneurs together, with the potential to increase entrepreneurship by expanding the pool of investors beyond the traditional circle of owners, relatives, and venture capitalists.**
